

## ■ Rohan Kosti – Interview Cheat Sheet

### 1. Tell Me About Yourself

My name is Rohan Kosti, from Ahmedabad. I've completed my BCA and I'm focusing on MERN stack development. I've built projects using HTML, CSS, and JavaScript, and I'm learning Node.js, Express, and MongoDB. I'm a quick learner and love building real-world projects.

### 2. Why Didn't You Do MCA?

After completing my BCA, I wanted to focus more on practical coding skills and real project development rather than continuing academic exams. So I joined coding classes to strengthen my technical and practical knowledge in full stack development.

### 3. Expected Salary

As a fresher, my main goal is to gain experience and improve my skills. I'm open to a starting salary in the range of ■10,000 to ■15,000 depending on the role and learning opportunities.

### 4. Technical Quick Answers

- var / let / const → scope difference
- == vs === → value vs value+type
- DOM → JS object structure of HTML
- Frontend vs Backend → UI vs Logic & Database
- Node.js → JS runtime for backend
- Express.js → framework for Node
- API → communication between frontend & backend
- MongoDB → NoSQL database (document-based)
- Semantic tags → header, footer, section, etc.
- React: props (input) | state (internal data)

### 5. HR Quick Answers

- Why Tririd? → Works on modern JS stack; good place to grow.
- Strengths → Quick learner, consistent, adaptable.
- Weakness → Sometimes overfocus on small details.
- 2–3 years goal → Skilled full stack developer.
- Work environment → Team-oriented, learning-focused.

### 6. Final Tips

- Revise your own projects
- Keep resume & GitHub ready
- Speak clearly & confidently
- Smile and maintain eye contact
- If unsure, say "I'm still learning that part."
